

CribX™ Vend

A Custom Satellite Storeroom that Goes Where the Work Is

CribX™ is the ideal solution for managing your inventory, no matter where you are. CribX™ containers are placed anywhere from large manufacturing environments to remote jobsites to securely store and manage critical inventory, while keeping your project running smoothly.

CribX in the Construction Field

- Securely store tools, supplies and equipment anywhere — from the far-reaches of a large or remote jobsite, to a mobile extension of your centralized tool crib
- Increases productivity by bringing equipment & tools right to the point of use, cutting down on wasted time traveling to far-away tool cribs
- CribX containers are WiFi-enabled and weather-proof, and temperature control keeps the unit accessible and comfortable in any environment
- CribMaster solutions provide 24/7 inventory tracking that reduces equipment & asset shrinkage

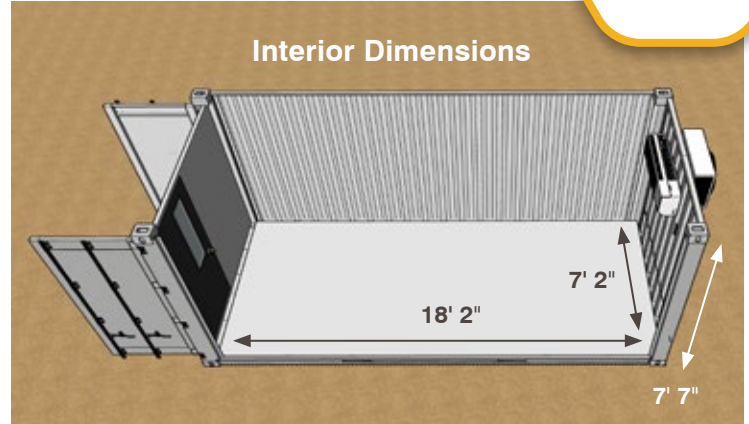

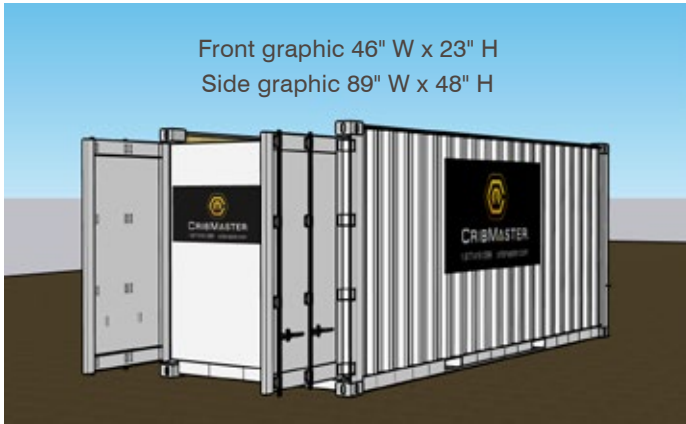

CribX Delivers Operational Efficiencies in Many Industries

- CribX can be an extension of your storeroom, managing overflow inventory wherever you need it
- Eliminates non-productive time spent traveling to centralized storerooms by introducing secure, satellite storerooms placed right at the work site
- Outfitted with CribMaster hardware & software that gives automated replenishment notifications and helps prevent stockouts
- Fully-integrated CribMaster software tracks tool usage and inventory levels, and will proactively alert you when it's time to replenish supplies

CribX is Built by You

- CribX is highly customizable — select any mix of locker, scale, or traditional vending machines for your unit
- Open container space leaves room for added tool room management, like pegboards & open shelving*
- Included branded graphics make it personal & keep your company top-of-mind

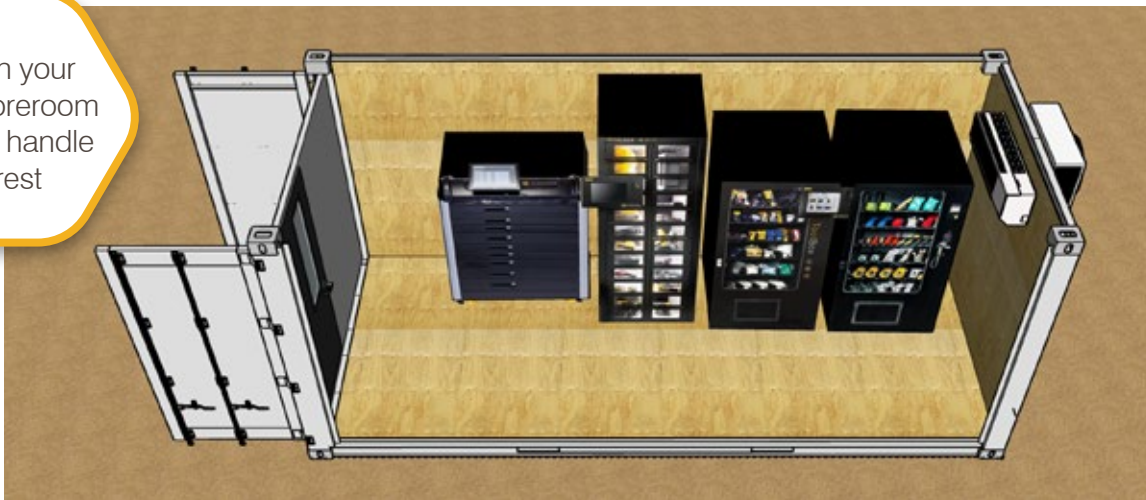

115 sq. ft. of useable space available for customization

The CribMaster Advantage

- We are industry leaders in inventory management — our solutions can scale up or down to what you need, and work in rugged environments where reliability is key
- CribX easily integrates with your existing CribMaster system, making it a seamless addition to your program
- After custom-building your container, CribX is delivered with the machines in the container & data installed
- Our team of Account Managers, Tech Support, Hosting & Implementations experts are always available to ensure a smooth planning, development & installation process

Design your ideal storeroom & let us handle the rest
